Steps to convert figma design to HTML/CSS code :

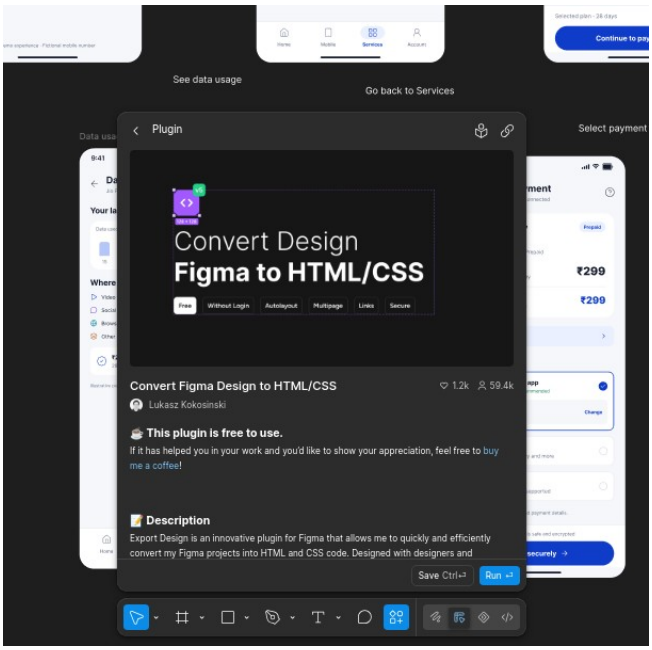

1. Go to the plugin

https://www.figma.com/community/plugin/1421932899298722297/convert-figma-design-to-html-css

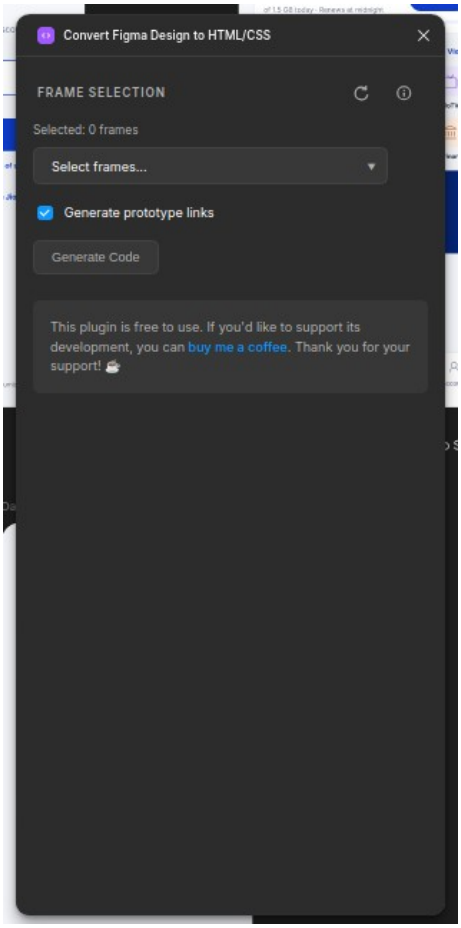

Now select your project :

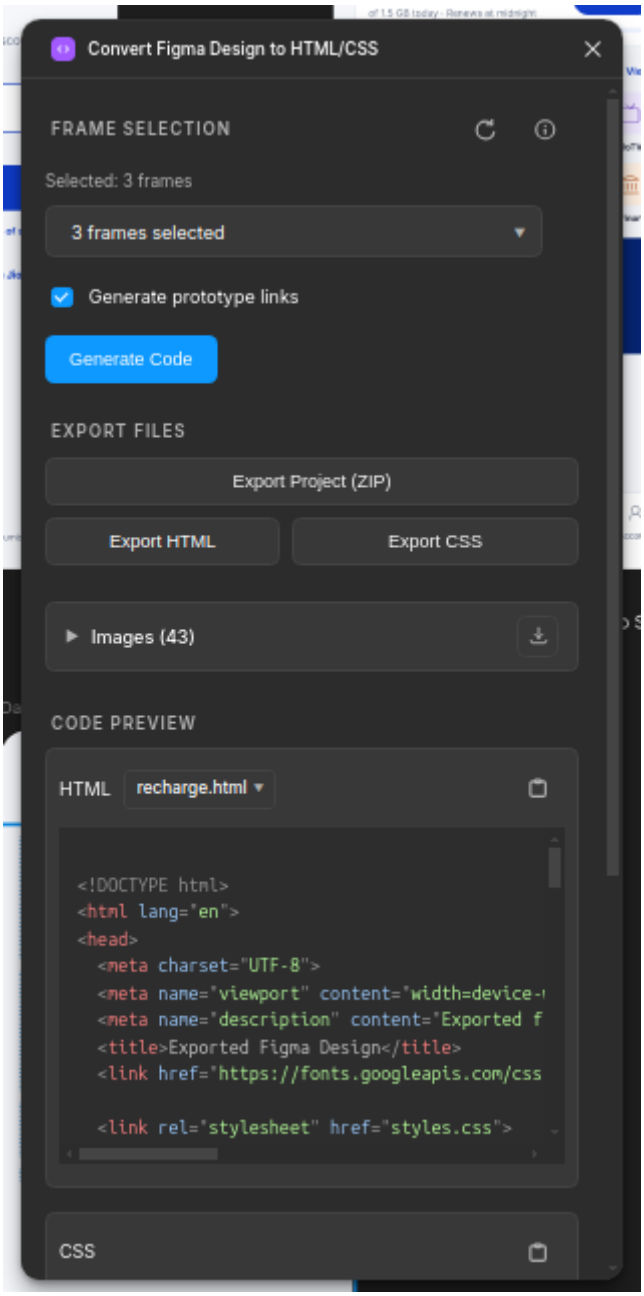

2. Click on run :

3. Now select the frames for which you want to generate the code . One can either select a single frame or all the frames at once .

4. Click on generate code and then export project as zip file

5. Then simply extract it and open in vs code and run the home web page of the site .
